PUBLISHED BY THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
33 WEST 39TH STREET, NEW YORK 18, N. Y.

This pamphlet contains complete multientry indexes covering the contents of *Electrical Engineering* for the calendar year 1950. It includes all special articles and authors, all news items, and all items published in *Electrical Engineering* on AIEE technical program papers, whether they appear in the form of a digest, essential full text, or full text. The technical program papers are indexed also by both title and author.

With further reference to technical program papers, if a *Digest* appears, it will be listed as (Digest of TP50-000). If the essential full text or the full text appears, it will be listed simply as (TP50-000).

The contents are arranged as follows:

1. **General Subject Index.** Lists all general articles including "Letters to the Editor" and all items published on AIEE technical program papers, arranged alphabetically by multiple subject entries.

2. **General Author Index.** Lists all authors of material covered in the general subject index per item 1 above.

3. **AIEE News Index.** Lists all news items pertaining to Institute Activities.

4. **Non-AIEE News Index.** Lists all news items "Of Current Interest" not pertaining directly to Institute Activities.

5. **Biographical Index.** Lists all personal and obituary items on AIEE members.
